## Web Application Developer

We are looking for a JavaScript Developer who is motivated to combine the beauty of mapping with the art of programming. You will be taking an active role in developing the full stack, bridging the gap between the front-end elements and the server-side infrastructure. You will be responsible for how the application looks and functions. The successful candidate will be both independent and collaborative, and possess the desire to continuously learn and teach others about the newest technical advancements.

### PRIMARY RESPONSIBILITIES

- Use JavaScript to develop high quality, reliable, tested code
- Inspire innovation and cultivate an environment of continuous improvement
- Continuously educate yourself and others on the latest developments in the industry
- Effectively debug new issues within a production system

### CANDIDATE SHOULD HAVE:

- A Bachelor's degree or higher
- A passion for JavaScript, ES6
- **Experience with React**, Redux, Express
- Proficiency with front-end development technologies: HTML5, CSS3
- Familiarity with front-end build tools, e.g. Gulp, NPM and Webpack
- Understanding of AWS technologies like S3, SQS and EC2
- Excellent problem-solving, design, development, and debugging skills
- Interest in mapping technologies, e.g. ArcGIS
- Must be legally eligible to work in the United States

**Please send us a note with a little bit about yourself, your resume and link to your GitHub:**
